## **Skills Summary**

Self starting individual driven to make everything I do successful. Traveling for work doing disaster relief has been a fun journey but ready to settle down and start a career. Started deploying generators in Puerto Rico after hurricane Maria, and worked my way to becoming a Superintendent of a construction company. I started as a Superintendent doing roof rebuilds in St Croix, then full rehabilitations consisting of roofs, stucco, windows and doors, drywall, kitchen, bathroom, almost full rebuilds in North Carolina, Louisiana, and Florida. In the gap between those jobs, as they are not permanent and come up as the government programs open, I started my own Telecommunications tower company doing upgrades from 4g to 5g. All these experiences have made me enjoy running a project and seeing the end result. Working on a time frame and hitting the mark always gives me a level of satisfaction that makes work fun. Although I do not have full building experience, I am ready to make that next step in my career and exceed expectations.

## **Education**

Bishop Verot High School 2011

AA from FGCU 2013

## **Certifications**

OSHA 10

Osha 30

Osha 29 - Cranes and Derricks in construction

Aerial Lift Operator
