CONSTRUCTION SAFETY

Tallahassee, FL 32305

ananke2020@gmail.com

+1 410 693 8036

Performing Safety Inspections in FL. & South GA. Working with many contractors, subcontractors and related Governmental Agencies. I perform Safety Inspections, audits, and develop Safety Plans prior to work being performed. I provide Field Training and assist with Classroom Training on various OSHA related topics regarding Construction Safety. I have performed these tasks for many other employers in the last 25 years. 03/19 to 09/2020

Willing to relocate to: Florida

Authorized to work in the US for any employer

Work Experience

Senior Quality Assurance Representative

Parsons - Tyndall AFB, FL

June 2021 to November 2021

Performing QA for U.S. Military MILCON Projects at the above location for USACE Support Contract. Performing QA for complex reconstruction and new construction of flight line buildings/projects that support the bases mission such as Fire Stations, Aircraft Refueling Maintenance Station, Aircraft/Drone Maintenance Hangers, runway and aircraft ramp upgrades along with Temporary Space Offices during the construction phase. Contract values of 450 million +-.

CONSTRUCTION MANAGER

REDHORSE CORPORATION

July 2017 to September 2018

I performed Contract Oversight, Quality Control, Safety and Quality Assurance, along with estimating project costs. I provided project management/supervision of Federal GSA construction contracts for Region 4. I performed Independent Government Estimates (IGE) for various Federal Agencies utilizing space in GSA buildings. Such agencies included United States District Courts, United States District Attorney's Offices and United States Marshalls Services. This work included duties such as security upgrades, office space renovations, Data and Security Control Rooms for Federal Buildings, and related support systems such as climate controls, security systems and general construction. I negotiated with contractors regarding the price of projects and worked closely with the Federal Contracting Officers to ensure compliance with all Federal Acquisition Regulations (FAR). I also performed on site inspections of all projects to ensure contract compliance with the approved drawings and specifications. I met with many United States Government Officials to determine the needs related to the construction, and developed a plan based on their concept of what they were requiring from these projects. I reviewed submittals for contract compliance and the meeting of contract specifications along with the contractors submitted construction drawings. I reviewed and approved contractors pay requests prior to the submission to the Contracting Officer for payment.

QA CONSTRUCTION REPRESENTATIVE, U.S. DOD

QA for OPM SANG, Technical Affairs Division at Eskan Village

March 2011 to February 2014

I worked for 35 months performing construction and materials QA & Safety for OPM SANG, Technical Affairs Division at Eskan Village. During this period, I worked on many military construction projects throughout the Kingdom of Saudi Arabia. My duties included Quality Assurance and Quality Control of construction projects and materials for such buildings as a six story high rise apartment building, and secure compounds for the military trainers and staff. This work consisted of civil work, underground utilities, airfield construction, and airfield support buildings. Aircraft runway construction of approximately 4000 meters for military aircraft, helicopters and drones to include ramps, signage/ markings, lighting, hangers and command & control systems and facilities. Precast concrete high rise along with the interior finishes, fire alarms and fire protection systems were all part of this project. Some of the security systems that were completed consisted of traffic barriers, guard towers, and a Command and Control Security Building with automated controls, video cameras, and communication systems. I was responsible for performing the testing and functionality of all systems for contract compliance and system operation. I also provided training for the maintenance staff and others on the systems in place. During this time, I also provided QA/QC for the firing range for the training of the Saudi National Guards for their armored vehicles. This was a large civil project.

QA CONSTRUCTION REPRESENTATIVE

U.S. ARMY CORPS OF ENGINEERS

January 2009 to March 2011

I was assigned to perform QA & Safety duties for the new construction of the Defense Information Systems Agency (DISA) headquarters at Fort Meade, under the MILCON projects. The focus of my duties was to verify and perform installation inspections of the approved communications and data components that were delivered, ensuring they were in satisfactory condition and that the factory testing documents were all in order. I also coordinated with the other Federal Agency's in reference to connecting with the existing communication system that would be shared.

CONSTRUCTION REPRESENTATIVE

DOJ FEDERAL BUREAU OF PRISONS & U.S. Veterans Affairs (2009 Tucson, AZ.)

August 1991 to January 2009

I performed QA/QC & Safety for the construction and the materials for new federal prisons in various locations throughout the U.S. The job consisted of site clearing, all underground utilities, roadways, security systems, precast concrete along with all interior finishes. I also performed testing and acceptance of the security systems, lighting, and life safety systems. QA was performed at operational facilities for security enhancements and roofing. Acceptance testing was conducted on all systems at facilities prior to contract completion and the acceptance of the final product. I received training in the Partnering Concept which allows all parties, owners, builders, and team members, to work together to resolve concerns and items of ambiguity to allow the project to make progress without delays. I also provided the coordination and installation of all health services equipment supplied by the government contractors and renovation projects for the VA Hospital.
